

ABOUT

The Canadian Agri-Food Policy Institute (CAPI) is an independent, non-partisan think tank that brings agri-food leaders together to explore emerging challenges, share insights and advance policy solutions that support a prosperous, sustainable and resilient food system in Canada.

Founded in 2004 with an initial grant from the federal government, CAPI works collaboratively with stakeholders across the agri-food value chain, including producers, processors, policymakers, researchers and adjacent sectors. Guided by systems thinking, CAPI undertakes rigorous research and convenes dialogue to inform smart policy choices grounded in both strategic foresight and practical realities.

Through innovative analysis, trusted convening and bold communication, CAPI contributes to Canada's long-term agri-food competitiveness by addressing complex issues such as productivity, trade, sustainability and risk. CAPI is committed to fostering inclusive, forward-thinking policy discussions that support the future of Canada's agri-food sector, at home and on the global stage.

ANNUAL REPORT 2024 - 2025

CAPI's second annual Exchange Conference brought together more than 200 agri-food leaders to network, collaborate and advance policy solutions in Ottawa, Ontario. Following the conference, 95% of attendees indicated they would recommend it to their network.

In 2024-2025, CAPI partnered with RealAgriculture on the Ag Policy Connection podcast to develop a six-part series on the future of Canadian farmland and land use policy as part of CAPI's PLAN initiative.

CAPI's PLAN initiative brought together research, reports and tools on agricultural land use. CAPI held multiple PLAN Policy Network Meetings, bringing together stakeholders focused on improving Canada's agriculture land use policies. These meetings provide a forum for voices across the sector to share insights, and forge a path ahead.

CAPI's regular webinars promote dialogue between researchers, partners and stakeholders on a variety of critical topics. In 2024, webinar partners included RealAgriculture, CCFI and GIFS.

CAPI continues to grow its online audience on social media, with a combined audience of 6.5k followers on LinkedIn and X. Over the past year, CAPI's content was shown almost 136k times on these platforms.

CAPI continues to focus on addressing how policy issues impact the agri-food sector through its Policy Pop-Ups series. CAPI published 28 one-minute Policy Pop-Ups on a range of topics, which were shared on YouTube, LinkedIn, X and in The CAPI Connection.

The monthly CAPI Connection e-newsletter is an important tool for connecting with CAPI's community online, with an audience of almost 5.2k subscribers.
